#### AM Ceramics

AM Ceramics 2019 will be one major part of ceramitec conference 2019 and explicitly focus on the topic of Additive Manufacturing with ceramics.

The AM Ceramics is the key event for additive manufacturing of high performance ceramics and one of the most important opportunities that gives you the chance to connect with 3D printing professionals from all over the world.

Contact [cc@lithoz.com](mailto:cc@lithoz.com) or [conference@ceramitec.com](mailto:conference@ceramitec.com) to become a part of AM Ceramics 2019.

#### Springer Wiesbaden

Springer Fachmedien GmbH is part of the publishing group Springer Nature, a global publisher that serves and supports the research community and one of the leading information service providers for technology and economics.

Springer Fachmedien Wiesbaden GmbH's contribution to ceramitec conference is to address participants from potential application industries and to bring them into contact with the ceramics industry through a large number of specialized magazines and digital media.

In addition, Springer Fachmedien organizes six technical slots for the application of ceramic materials in the areas of automotive, lightweight construction and electronics as well as a panel discussion during the conference.

Please contact Dr. Pelc at [hubert.pelc@springernature.com](mailto:hubert.pelc@springernature.com) or [conference@ceramitec.com](mailto:conference@ceramitec.com) to become a part of the conference.

Deutsche Keramische  
Gesellschaft e. V.

## DKG

The DKG is the German ceramic society with the largest number of members in Europe and one of the oldest professional associations in the world. For 100 years, the DKG has been the forum for all technical and scientific questions on the subject of CERAMICS. The society maintains a unique network between users, manufacturing industry, research, science and teaching.
